

Unity Gardens 2021 Grant Recipients

Spring 2021

Annapolis High School

Annapolis High School Courtyard Entrance

To continue the enhancement of the entrances to Annapolis High School by developing to pollinator gardens in an underused courtyard area and remediate erosion areas and sediment runoff.

Annapolis

Arundel Rivers Federation

Herrington Harbour Stream Restoration and BMP

To purchase plants for a large scale stormwater Best Practice Management and restoration planting, located near a stream flowing into Herring Bay.

Tracy's Landing

Beverly Beach Neighborhood Association

Beverly Beach Neighborhood Marina Butterfly Garden

This project will convert an area covered with turf at the edge of our neighborhood marina into a conservation landscape with a native butterfly garden, to help intercept storm water from the street that currently spills directly into Cadle Creek.

Mayo

Cedar Ridge Homes Association

Green Mulch for a Sustainable Landscape

This project will incorporate a "green mulch" philosophy into an existing conservation landscaped area by adding native groundcovers to promote a more sustainable landscape that will require less maintenance and more habitat value.

Annapolis

Herald Harbor Citizens Association

Herald Harbor Community Tree Planting

Locust Trail Reforestation Site

To provide funding for community planting efforts and restoration of community property.

Crownsville

Indian Creek School Green Club

Indian Creek School (ICS) Green Club Garden

To fund a demonstration pollinator garden in a highly visible area.

Crownsville

Key School

The Meadow at Key School

To allow the fourth grade to plant a variety of native plant species in the meadow area of Key School during Earth Week and to improve the meadow area for use as an outdoor classroom.

Annapolis

Marley Glen School

Marley Glen Special School Pollinator Garden

To create a pollinator garden for students and teachers to use in studying pollinators. We are a Maryland Green School and this project is part of our ongoing effort to green our campus.

Glen Burnie

Severn House Condominium

Severn House Hill Erosion

To plant native ground cover to reduce amount of erosion in to Back Creek.

Annapolis

St. Luke's Episcopal Church

St. Luke's Restoration of Nature

The purpose of this grant is to purchase native plant material for erosion control, habitat enhancement, and to replace other plants removed for control of invasive species (English ivy, Japanese honeysuckle, etc.).

Annapolis

Timbers Civic Association

Timbers Civic Association/Eagle Scout Project

To transform an area currently overrun with invasives into a walking path and memorial garden surrounded by pollinator plants and native shrubs.

Arnold

Fall 2021

Chesapeake Bay Foundation

Bioretention Rehabilitation and Conservation Landscape

This project will restore and rehabilitate an existing stormwater management area (bioretention) by removing invasive plant species and vines and installing a 1,550 square foot conservation landscape consisting of native trees, shrubs, and perennials.

Annapolis

Crofton Civic Association

A Pollinator Paradise at Swann Park

The Crofton Civic Association and enSprout are partnering to rejuvenate our community's connection to nature by establishing and maintaining a new pollinator garden at Swann Park in Crofton, Maryland. If awarded this grant, our educational program will target the community's families, teaching them how to contribute to a healthy, sustainable ecosystem through environmental stewardship.

Crofton

Eden Ministry Rain Garden Renewal

Empowering Believers Church

This project will engage our historic African American congregation in environmental action and increase our understanding of the way specific native plants can be used to address stormwater runoff, especially in areas where standing water and flooding are an issue.

Glen Burnie

Fair Oaks Community Association

Native Plants for Stormwater: Center Court

Stormwater management for the surrounding basketball court area to eliminate stormwater runoff into the adjacent Cool Spring Cove which feeds into Cattail Creek & the Magothy River.

Severna Park

Historic Baldwin Hall

Native Plants Project 2021

Improve the grounds of Historic Baldwin Hall by removing overgrown bushes and planting smaller native plants to make grounds more attractive for people and wildlife.

Millersville

Historic London Town and Gardens

Visitor Center Berm Restoration and Enhancement to Create a Pollinator Corridor

London Town will restore and enhance the berm in front of the Visitor Center. This grant would complete our efforts to turn the berm into a true pollinator garden, while using low-watering techniques to serve as a "Bay-wise" example.

Edgewater

Jug Bay**Friends of Jug Bay**

The purpose of this grant is to revamp the raised garden bed in the parking lot of the visitor's center at Jug Bay Wetlands Sanctuary.

Lothian

Severna Park Library**Native Garden**

Hollyberry Garden Club will use fund received to purchase native plants and mulch to expand and supplement the existing Native Garden at the Severna Park Library.

Severna Park

St. Andrews by the Bay**Woodland Edge Restoration**

This project will add perennials to the Woodland Edge Restoration planting of trees and shrubs started last year at St. Andrew by the Bay Catholic Church. This will provide additional wildlife habitat, replace invasives, beautify the parish grounds, and engage parishioners in planting, caring for, and appreciating native plants.

Annapolis

St. Anne's Cemetery

Together with the Thursday morning gardening team, aka "Cemetery Stewards", we are planning to remove invasive vines and ivy and stabilize the bank with native plants. This project will be the first step towards creating a meditation garden for reflection and the future installation of a columbarium.

Annapolis

Tawes Garden**Plant Mural Transition**

This grant will be used to redesign a portion of the Plant Mural in Tawes Garden to incorporate more native plants at Helen Avalynne Tawes Garden

Annapolis

Wilson's Grove HOA**Turf Lot Improvement**

To provide funding to transform a portion of a turf field using native trees and plants to create a pollinator garden and bird-friendly habitat in a highly visible area of the community.
